

VIVO AQUATICS

VivoAqua

**Every Pool Open, Safe
and Guest-Ready.**

VivoAqua brings together equipment,
VivoPoint intelligence and expert sourcing
and water service.

CHALLENGE

When the water goes wrong, everyone notices.

A closed pool means disappointed guests, bad reviews and lost revenue. Yet most properties still manage their water with separate vendors, manual tests and paper logs, so problems surface only after they've already cost you.

SOLUTION

Peace of mind for every pool, spa and water feature.

VivoAqua is a commercial aquatic management solution that brings everything your property needs into one package, customized to you.

Water That Stays Balanced

Vivo Edge controllers, sensors and sanitizer systems specified for your property keep chemistry in range automatically and log every reading.

Answers Before Problems

See every body of water in real time, get alerts before issues become closures and ask Blu, the AI water expert built into VivoPoint, anything on demand.

Experts in Your Corner

Our team sources the products, services your water and solves recurring issues, so your staff is never on their own.

"At any given moment, I can see that zero percent of my pools are out of compliance. That's not something many properties can say."

**Robert Barth, Pool and Spa Operator,
Resorts World Las Vegas**

KEY BENEFITS

Help Whenever You Need It

Real-time support from aquatic experts who service your water, solve recurring issues and source the parts and chemicals you need. One call, one team.

Catch Issues Before Guests Do

Text and email alerts flag water imbalances, potential leaks, low chemical supply and equipment malfunctions early.

Be Inspection-Ready Anytime

Every reading is recorded automatically. Pull history and trends in seconds, or get scheduled reports in your inbox.

See Every Property at a Glance

One dashboard for your whole portfolio. Compare sites, spot the ones trending the wrong way and send your team where it's needed.

Get Repairs Done Faster

Create, assign and track service orders for any body of water, so everyone knows who owns each repair.

Protect What You've Invested

Choose Vivo Edge or keep the controller you have. VivoAqua works with a wide range of controllers, sensors and sanitizer systems.

HOW IT WORKS

Featured: Vivo Edge Controller. Specified by our team and connected to VivoPoint out of the box.

Already have a controller? VivoAqua integrates with leading systems.

1 Sensors

Know what's happening in the water every minute, not just when someone checks.

2 Sanitizer Systems

The right sanitizing setup for your property, whether you're building new or working with what's in place.

3 VivoConnect Gateway

Readings reach VivoPoint over a secure cellular link. No onsite internet or IT project required.

4 VivoPoint Platform

Every pool, spa and water feature, with alerts and automatic logs, in one place.

*Available to lease or purchase.
